AES Corporation » Latin America

Operating facilities in the region since 1993

48 generation plants

11,181 MW generation capacity

9 utilities serving more than 8 million customers

Approximately 10,000 AES people working in Latin America If all the AES businesses in Latin America were combined into one, it would be the second largest privately owned power company - and 25th largest company of any kind - in the region.

AES entered the Latin American market in 1993 when we acquired the CTSN power plant in Argentina. In the span of a decade, we have become a leader throughout the region, powering growth in both urban and rural communities. We also have deep local roots throughout Latin America. AES

Eletropaulo in Brazil—the largest electric utility in the region with over five million customers—has been serving its customers for over 100 years, and today is among the highest performing energy businesses in the region.

In Chile, we are the second largest generator of electric power. In El Salvador, AES provides electricity to 80% of the entire country, including campesinos and remote villages that have never had reliable power before. In Argentina, AES is one of the largest private power generators in the country, producing approximately 12% of the country's total power generation capacity. AES's three distribution businesses in Argentina serve approximately 750,000 customers in the state of Buenos Aires. In the Dominican Republic, AES Andres is the newest and largest private power generator in the country. The facility is a 319 MW gasfired plant and LNG regasification terminal. In Panama, we will be the largest producer of electricity in the country, once our new 216 MW hydroelectric power plant is up and running, expected in mid-2010.

Throughout the region, AES remains a vital force—seeking to meet new demands and fuel growth.

Forward Looking Statements: Financial information in this fact sheet is in summary form. The complete financial statements and notes are filed in the Company's Form 10-K for the year ended December 31, 2006, as well as our other Securities and Exchange Commission (SEC) filings, and should be read in conjunction with this fact sheet. Copies of these filings can be obtained from our website at www.aes. com, or from the SEC's website at www.sec.gov. Also, certain statements in this fact sheet may constitute "forward-looking statements" as defined by the SEC. Such statements are not historical facts, but are predictions about the future that inherently involve risks and uncertainties, and these risks and uncertainties could cause our actual results to differ from those contained in the forward-looking statements. In addition, AES disclaims any obligations to update any forward-looking statement to reflect events or circumstances after the date hereof. We urge investors to read our descriptions and discussions of these risks that are contained under the section "Risk Factors" in the Company's most recent Form 10-K as noted above.
